

CERAMATERIALS

"Your One Stop Shop for Thermal Processing"

ITC Problem Solving & Application Chart

Aluminum Smelters

Repair and maint. brick, fiber and castables in contact with molten aluminum.	ITC-100, 148, 296A
Repair and maint. brick, fiber and castables on doors and above molten metal.	ITC-100, 200, 296A
Repair and maintain furnace door jambs	ITC-100, 148
Repair and maintain crucibles, pouring ladles and troughs	ITC-100, 148, 296A
Minimize dross buildup and carbon deposits on metal	ITC-213, 296A
Protect graphite pumps and graphite parts used in molten metals	ITC-213, 100, 296A
Protect and prolong thermocouple life	ITC-213, 296A
Repair burner blocks	ITC-100, 200

Die Casters

Save fuel	ITC-100, 200, 296A
Repair and maintain refractory	ITC-100, 200, 296A
Minimize seeding, peeling, chipping, dusting and cracking of refractory	ITC-100, 200, 296A
Protect metal utensils such a ladles, skimmers, thermocouples	ITC-213, 296A
Repair burner blocks	ITC-100, 200

CERAMATERIALS

Steel Foundries

Repair and maintain tundish	ITC-100, 148, 296A
Minimize slag buildup on metal equipment	ITC-213, 296A
Repair and protect metal molds	ITC-213, 296A
Repair and maintain crucibles, ladles and pouring troughs	ITC-100, 148, 296A
Prolong electrical element life	ITC-213, 296A
Spray coating for sand molds	ITC-213, 296A

Forge and Blacksmith

Repair and maintain refractory fiber, castables and brick forge linings	ITC-100, 200
Seal refractory fiber blanket and increase infrared reflectance	ITC-100, 296A
Repair and protect burner nozzles and tuyeres	ITC-213, 296A
Protect metal ladles, skimmers and pipe crucibles	ITC-213, 100, 296A
Coat parts for heat treating	ITC-213, 100
Prevent oxidation of exotic metals	ITC-213

Heat Treaters

Save fuel, improve uniformity of temperature	ITC-100, 200, 296A
Repair brick or fiber in furnaces	ITC-100, 200
Prolong electrical element life	ITC-213, 296A
Protect fans retorts and other metal parts	ITC-213, 296A
Mend cracked steel in ovens	ITC-213, 296A
Repair burner blocks	ITC-100, 200
Reduce recovery time	ITC-100, 200, 296A

CERAMATERIALS

For additional technical information and assistance. Please call:
International Technical Ceramics LLC, PO Box 903030, South Lake, TX
32004 - (817) 337-9889 Greg Odenthal, Director of Engineering and
Technical Operations, greg@itccoatings.com

Potters, Artists, Porcelain, Brick and Tile Manufacturers

Save fuel, cut down firing times, improve uniformity of temperature	ITC-100, 200, 296A
Repair brick and fiber in kilns	ITC-100, 200
Minimize kiln dirt and improve ware quality	ITC-100, 296A
Minimize glaze sticking to shelves and kiln furniture	ITC-100, 296A
Prolong electrical element life	ITC-213, 100, 296A
Protect metal sand seals on car bottoms and metal burner tips	ITC-213, 296A
Repair burner blocks	ITC-100 200

Power Plants, Paper Mills & Incinerators

Repair and prolong refractory life in furnace area and minimize ash build-up	ITC-100, 148, 296A
Protect metal water and steam pipes in boiler area and minimize ash build-up	ITC-213, 296A
Repair burner blocks	ITC-100, 200

Gold, Silver & Other Precious Metals

Repair and maintain crucibles and ladles	ITC-100, 148, 296A
Repair and maintain graphite equipment and parts	ITC-213,100,148,296A

Forge, Furnace and Kiln Construction

Protect metal surfaces, door frames, tuyesers and burner nozzles	ITC-213, 296A
Prime metal for application of other refractories	ITC-213
Coating and gluing fibre boards and blankets (Kaowool)	ITC-100
